Problem Solving
Team Player

English - working proficiency
Italian - native language
German - elementary proficiency

About Me

Dropping out of Mathematics studies during Covid, I went exploring ecovillages and alternative ways of living. Thanks to this experience I gained an unshakable conviction about the goodness of mainstream modern society despite the many challenges that it brings. Based on this premise I believe I can leverage my natural analytical disposition to be a great addition to any team that is focused on achieving goals and delivering the best outcomes in a timely manner.

Work Experience

Full Stack Developer
Huroos Srl (MI, Italy)   04/2023 - 08/2023

- Developed Backend Python applications to perform logic on database data
- Frontend: XML and QWeb Templating Engine
- Analysis and digital mapping of Business Processes, Helpdesk support to Customers
- Migration and testing of Odoo community modules
- Delivered first development iteration of new ISO module project 30 days ahead of schedule
- Managed Odoo.sh SaaS workflow with deployment of new features both in staging and production

Accountant and Administrative
University of Bologna   07/2022 - 04/2023

- Passive Cycle accounting with UGov software, Request for Quotation and Supplier Tender managing
- Managed Inventory and leveraged the Informatic Protocol System for the storage of all new documents
- Streamlined the process for electronic elections
